IV Health declaration

I (the undersigned Official Veterinarian) do hereby certify that:

1. The products have been manufactured in Finland. OR
 a) The products have been manufactured in another EU country (country origin: _____) according to the EU Regulation (EC) 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law. The products have been manufactured and transported as laid down in the principles, requirements and procedures covering all stages of food and feed production and distribution accordingly. b) The products were moved from the manufacturing Member State to the exporting Member State for trade into the Republic of Korea in full conformity with the import sanitation requirements according to the Special Act on Imported Food Safety Control of the Republic of Korea.
2. Milk collection, manufacture, processing, packing, distribution, handling and storage of the exported livestock products have been performed in compliance with sanitary regulations on livestock products enforced in the Republic of Korea and these products have been handled and shipped to the Republic of Korea in a manner avoiding re-contamination.
3. The exported livestock products were manufactured with raw materials that are derived from animals found to be in a good general state of health in testing and examination accredited by the exporting country's government and that are suitable for human consumption, and raw milk used in the manufacture of such products was periodically controlled and examined by the government's veterinary authority.
4. The exported livestock products comply with the relevant criteria of standards and specifications regarding food processing in the Republic of Korea on chemical residues (antimicrobial agents, agricultural chemicals, hormones, heavy metals and radioactive materials) and pathogenic microorganisms (*Salmonella*, *Staphylococcus aureus*, *Clostridium perfringens*, *Listeria monocytogenes*, Enterohemorrhagic *Escherichia coli* and others) that cause public health risks.
5. Containers or packaging materials for the exported livestock products comply with sanitary requirements in the Republic of Korea and they are made of materials that are clean and harmless to humans.
6. The exported livestock products are suitably labeled to show the product name, manufacturer and date of manufacture (or sell-by date).
7. The exporter's establishment must comply with the following requirements:
 - a. It shall be an establishment approved or registered and controlled by the competent food control authority of the exporting country in accordance with the exporting country's regulations and also registered with the Korean government.
 - b. It shall be an establishment that has a food safety control program, such as HACCP and GMP and maintains the relevant records for more than two years.
 - c. It shall be an establishment that has documents which describe all operations, from receipt of raw materials to production and release, and specify actions to be taken when non-conformance is found and maintains the relevant records for more than two years.
 - d. The water used in processing and treatment of the exported livestock products shall be suitable for human consumption and shall comply with drinking water regulations in the Republic of Korea or exporting country.
 - e. It shall be an establishment that has a document which describes recall procedures and methods and the exported products can be traceable from production to final sale.
